**WHEREAS:**

Re: Purchase of a John Deere 544 P-Tier Wheel Loader

Cc: Gary Rhodes, Director of Solid Waste

We currently have a 2013 John Deere 624K front end loader with roughly 9,500 hours that we purchased used in 2017 from the City of Lexington South Carolina handling all of the garbage that flows through the transfer station. When this unit is down for service, we utilize a backhoe that is too small to handle the volume of garbage. When our older of our two backhoes burned up overnight earlier this summer, we took the opportunity to determine what our true needs are for the equipment in the transfer station. Given the hours on our current front end loader, we are requesting consideration of the purchase of a new John Deere 544 P-Tier Wheel Loader from Dobbs Equipment for the total price of \$172,365.68.

The price includes the modifications necessary to make this loader useable in the transfer station and to use our existing front end loader buckets and couplers. This price includes a \$60,000 trade in credit of our 2022 John Deere 410L backhoe that is not usable in the transfer station and is not needed by any other county department. The quote from Dobbs Equipment was the lowest of three bids gathered and outlined on the attached bid sheet.

The funding would come from the expected insurance payoff from the backhoe that caught on fire (\$33 thousand) and funds unallocated in the 2024 Lease Purchase Escrow account (total unallocated funds \$237,585).
